

Bibhash lenka

(MERN Stack Developer)

+91 7990721091 bibhash.reactjsdev@gmail.com [LinkedIn](#) [GitHub](#) [Portfolio](#)

SUMMARY

MERN / full-stack developer with 2.5+ years shipping production web applications (B2B SaaS, operations, fintech). Recent scope includes user-facing products at 4,000+ learner scale (Revizze, per public product stats) and multi-tenant B2B suites. Own architecture through release: REST API design, multi-tenant isolation, OAuth 2.0 integrations, security review, automated testing, and production support. Core stack: React.js, TypeScript, Node.js (Express.js, Hapi.js), MongoDB where applicable; cloud integrations (AWS S3, Stripe, Gmail API, Twilio, Clerk, and others). Uses AI-assisted IDEs (Cursor, Kiro, Google Antigravity) and spec-driven workflows as accelerators with full ownership of design, code review, and quality gates. Strong Agile collaboration, Redux Toolkit / TanStack Query / Zustand, CI/CD deploys, and background automation (Trigger.dev, node-cron).

EDUCATION

Bachelor of Engineering in Chemical Engineering

Prime institute of engineering and technology (9.1/10)

June 2016- August 2020

Navsari, Gujarat

Career pivot: transitioned from chemical production roles into software via structured self-study and professional experience; 2.5+ years building production MERN and full-stack applications for clients.

Higher secondary certificate

Gyan jyot vidyalaya

June 2014- August 2016

Surat, Gujarat

Secondary school certificate

Adarsh hindi vidyalaya

June 2013- June 2014

Surat, Gujarat

EXPERIENCE

Software Developer (MERN Stack)

Techfidants

July 2025 - Present

Surat, Gujarat

- Shipped full-stack features across 3 concurrent production surfaces: Skyline (elevator lifecycle), 2 white-label client portals (Wyton Developers, LIFTREX), and TalleFlow (multi-tenant B2B) — React.js, TypeScript, Node.js, Hapi.js/Express.js, MongoDB.
- Owned modular REST APIs (service-layer, Joi/Zod validation, JWT, Swagger/OpenAPI docs) consumed by multiple SPA clients; integrated 7+ external services (AWS S3, Gmail OAuth2, Stripe, Clerk, Twilio, Adobe PDF, Nodemailer, etc.) with clear contracts — estimated 30%+ fewer integration defects vs ad-hoc handoffs (tracked via QA cycles).
- Built asynchronous automation with Trigger.dev and node-cron covering 6+ job types (workflows, reminders, sync, idempotent dispatch) safe for horizontally scaled deployments.
- Delivered 12+ major UI areas (project hubs, e-signatures, invoicing, calendar sync, admin tooling) with TanStack React Query, Zustand, Radix / shadcn-style components, and Framer Motion; used AI-assisted IDEs as accelerators under engineer-led architecture, review, security checks, and QA.

Jr. Software Developer

Sourcecube Technology Pvt. Ltd.

November 2023 - June 2025

Surat, Gujarat

- Owned 4 production React SPA products end-to-end over ~18 months (invoice / bilingual UI, Web3 RPC dashboard, cloud deploy console, AI-assisted DB analyzer), each with Redux Toolkit and RESTful backends — all merges via mandatory peer-reviewed PRs.
- Improved load and runtime behavior using route-level code splitting, lazy loading, and re-render tuning; ~25–35% lower initial JS on lazy-split routes vs monolithic entry bundles (staging Lighthouse).
- Built 20+ reusable UI primitives and layouts reused across 3+ client codebases; standardized ESLint/Prettier.
- Ran 2-week Agile cycles in ClickUp (~40 sprints); weekly code reviews across active products.

Jr Software developer Trainee

3Elixir Software Solution

September 2023 - October 2023

Surat, Gujarat

- Completed an intensive 2-month React.js onboarding; shipped 8+ small interactive UI features (forms, lists, responsive layouts) using React.js, HTML5, CSS3, and ES6+ under senior-developer mentorship.
- Established Git branching, folder structure, and component reuse patterns applied in later production roles.

Production Officer/Executive

Sun Pharma, Lupin Industries Ltd.

November 2020 - May 2023

Ankleswar, Gujarat

- Prior manufacturing operations role before career transition to software development (see education note).

PROJECTS

TalleFlow — Multi-Tenant B2B Operations Platform

-

<https://app.talleflow.com/>

- Full-stack ownership of a multi-tenant B2B suite spanning 10+ product domains (projects, tasks, contacts, documents, forms, e-signatures, billing, community/marketplace, user-defined automation, background workers).
- Stack: React, TypeScript, Vite, Tailwind CSS, shadcn/ui, React Router, TanStack React Query, Zustand, React Hook Form + Zod; Node.js, Express, MongoDB / Mongoose, Clerk (auth + webhooks), Stripe (billing + webhooks), Trigger.dev.
- Integrated 8+ external systems (Google Gmail/Calendar, Microsoft Outlook, Zoom, Unlayer, Canva, Shopify, Resend, and related OAuth flows). Quality: Vitest (unit/integration) and Playwright E2E (authentication, tenant isolation, critical user journeys).
- Delivery combined AI-assisted coding tools with hands-on architecture, API design, security review, and production rollout.

Skyline — Elevator Project Lifecycle Management

-

<https://dev-qa-skyline.onrender.com/>

- Core operations platform covering 10+ workflow areas (proposals MRL/hydraulic/traction, contracts, inspection and permit stages, client directory, Gmail-linked inbox, documents, payments, notifications). Extended one codebase to 2 branded client portals: Wyton Developers (<https://portal.wytondevelopers.com/>) and LIFTREX (<https://portal.liftrex.com/>).
- QA / internal: <https://dev-qa.skyline.onrender.com/>
- Frontend: React 18, TypeScript, Vite, React Router 7, Tailwind CSS, Radix UI, Redux Toolkit + redux-persist, TanStack React Query, Axios, React Hook Form + Yup, Framer Motion, Google Maps, Google OAuth.
- Backend: Hapi.js 21, Joi, Mongoose 8 / MongoDB, JWT, hapi-swagger, Winston, node-cron; 10+ integration touchpoints (AWS S3, Gmail API OAuth2, Twilio, Nodemailer, Dropbox, Adobe PDF, wkhtmltopdf, Handlebars, ExcelJS, etc.).

Revizze — IB Exam Prep Platform

-

<https://www.revizze.io/>

- Public product: <https://www.revizze.io/> (IB exam-prep platform; product serves 4,000+ students per public messaging).
- Admin-side full-stack: React admin UI and REST APIs for internal operations, content workflows, and tooling behind study plans, exam-style practice, summaries, quizzes, Extended Essay builder, and grade/progress insights.

SANAD-HUB — Invoice Management Platform

-

<https://sanadhub-frontend.netlify.app/login>

- Built a bilingual (Arabic / English) invoice management platform with RTL layout support using React.js, Joy UI, and Tailwind CSS for layout, spacing, and responsive styling.
- Enabled admins to create and customize invoice templates, manage client financial records, and export structured billing data; integrated REST APIs for dynamic data rendering.

Additional products & demos (portfolio)

-

<https://bibhash-lenka.netlify.app/>

- Unode — Web3 RPC platform: MetaMask, NowPayments, Superfluid (<https://unode.unification.io/>). Xplorx — deploy Docker/GitHub/PostgreSQL, logs & custom domains (<https://cloud.xplorx.app/>). DBLYSER — PostgreSQL performance & AI insights (<https://dba-fe-xxxvii-ptbu.onxplorx.app/>). Book-My-Band — bands/fans, Razorpay (<https://bookmyband.live>). More links and context on portfolio.

SKILLS

Languages & markup: JavaScript (ES6+), TypeScript, HTML5, CSS3, JSX

Frontend & UI: React.js, Vite, React Router, Tailwind CSS, Radix UI, shadcn/ui, Material UI, Joy UI, Chakra UI, Bootstrap, Styled Components, SASS, Framer Motion, responsive & cross-browser UI

State & data fetching: Redux Toolkit, redux-persist, Zustand, TanStack React Query

Forms & validation: React Hook Form, Formik, Zod, Yup

Backend & APIs: Node.js, Express.js, Hapi.js, REST API design, JWT, Joi, MVC / service-layer architecture, Swagger / hapi-swagger, Winston, node-cron

Data: MongoDB, Mongoose, PostgreSQL (managed instances, analytics, performance tooling)

Integrations & services: OAuth 2.0 flows (Google, Gmail, Clerk, Stripe webhooks), AWS S3, Google Maps API, Stripe, Twilio, Nodemailer, Dropbox, Adobe PDF Services, wkhtmltopdf, Handlebars, ExcelJS, Trigger.dev, Resend, MetaMask, NowPayments, Razorpay, Superfluid

Testing: Vitest, Playwright

Platforms & delivery: Docker (basics), CI/CD via Vercel, Netlify, Railway (git-based deploys)

Practices: Agile / Scrum, spec-driven delivery, AI-assisted development (structured prompting and IDE workflows), collaborative and LLM-assisted code review with engineer sign-off, production hardening

TOOLS / SOFTWARE

Design & UX: Figma

Editors & AI IDEs: Visual Studio Code, Cursor, Kiro, Google Antigravity

Workflow: spec-driven development; AI-accelerated implementation with engineer-owned architecture, review, and release

Collaboration & PM: ClickUp

API debugging: Postman

Version control: Git, GitHub, GitHub Desktop

Quality & debugging: ESLint, Prettier, Chrome DevTools, React Developer Tools, Redux DevTools

Package managers: npm, Yarn
